We have reached a decision regarding your submission to INTERNATIONAL JOURNAL OF CONSTRUCTION SUPPLY CHAIN MANAGEMENT, "INNOVATION INCREASES THROUGH SUPPLY CHAIN AND INFORMATION TECHNOLOGY COLLABORATION".

Our decision is: Revisions Required

Reviewer A and B:

It looks like the author submitted a different file. Because there is a difference between the title of the submission and the title of the document. However, the following review is conducted on the file submitted with the title "Religious Patterns Among Entrepreneurs in Cilacap, Central Java":

- Please reconsider the title of the study. It should be more explicit and reflect the research in a meaningful way.
- In abstract section, before stating the objective of the study, briefly explain the research gap and significance. Also briefly explain the methods of the study.
- Add more relevant keywords to reach broader readership.
- Introduction section should be rewritten. Background, theoretical gap and significance of the research is missing. Therefore, it is recommended to highlight the significance of the study and explain how the researcher came up with the idea of the research.
- Literature review is not critical and insufficient to establish the rationale of the research. Therefore, it is suggested that a critical review of the literature be included in the light of the relevant theory and the research GAP be presented accordingly.
- Methodology section of the study needs significant improvements. The type of research along with research methods applied to carry out the study, including sample size, sampling and data analysis technique along with data collection procedure should be discussed.
- Refine the discussion section and discuss the findings of the study in light of recent studies.
- Please provide limitations and directions for future research in separate section.

Recommendation: Revisions Required
