Kepada: Prof. Dr. Andrejs Skesters <editor@eurchembull.com>

Dear Editor  
ECB Journal

I have read and used scientific articles published in ECB Journal.

The performance of the ECB Journal was excellent, and the published article helped me conduct research and write scientific articles.

I am Siswadi, Lecturer from UIN Prof. KH. Saifuddin Zuhri Purwokerto, Indonesia

I have completed a scientific article entitled "*Social Science Learning Management Using a Scientific Approach at Islamic Elementary School in Indonesia.*"

I hope this article can be published in the ECB Journal because there are interesting findings in the scientific article that can become new treasures in sciences, especially in the field of social sciences.

I am willing to go through the review process following ECB Journal standards.

Best Regards,

Siswadi  
UIN Prof. KH. Saifuddin Zuhri Purwokerto, Indonesia

Dear  
Siswadi  
UIN Prof. KH. Saifuddin Zuhri Purwokerto, Indonesia

Thank you for submitting your manuscript to ECB Journal.

We have completed our evaluation, and the reviewers recommend reconsidering your manuscript following minor revisions. We invite your article to send back after addressing the comments below. Please resubmit your revised manuscript by April 4<sup>th</sup>, 2023, or ask whether an alternate date would be acceptable.

When revising your manuscript, please consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any comments not addressed. Please also note that the revised submission may need to be re-reviewed.

To submit your revised manuscript, please log in as an author at this email, and navigate to the "Revision" folder. ECB Journal values your contribution, and I look forward to receiving your revised manuscript.

Editor and Reviewer comments:

Reviewer #1:

1. Clarify the research objectives: It would be helpful to explicitly state the study's specific objectives in the abstract. This will provide readers with a clear understanding of what the research aims to achieve and the significance of the findings.
2. Expand on the research methodology: Provide more details regarding the qualitative research methods, such as the sample size, selection criteria, and data collection techniques. This will enhance the credibility and replicability of the study.
3. Elaborate on the learning steps: Provide a more comprehensive explanation of each learning step involved in the scientific approach. This will help readers understand the practical implementation and the rationale behind each step.
4. Include specific examples or case studies: To enhance the study's impact and validity, consider including specific examples or case studies that illustrate applying the scientific approach in social science learning. This will provide concrete evidence and make the findings more relatable.
5. Discuss limitations and future research directions: It would be beneficial to discuss the limitations or challenges faced during the study, such as the generalizability of the findings or potential biases. Additionally, suggest potential areas for future research that could build upon this study's findings and address any existing gaps in knowledge.

I hope your team can make improvements as soon as possible and send the revised article again via this email.

Dear  
Editor ECB Journal

Thank you for the patience of the ECB Journal Editorial Board. Waiting for the revision of my article.

I have made improvements according to the reviewer's instructions. I would be happy if there are still points that need further improvement in the article.

The revised Article is Attached.

Best Regards,

Siswadi

Dear

Siswadi  
UIN Prof. KH. Saifuddin Zuhri Purwokerto, Indonesia

Thank you for your efforts to make improvements to your article.  
Based on the Reviewers' considerations, the article has, at some point, increased.  
However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. Strengthen the theoretical framework: Provide a clear framework supporting implementing the scientific approach in social science learning. This will help establish a strong conceptual basis for the study and demonstrate how it aligns with existing literature.
2. Include a more diverse sample: Consider expanding the sample size and diversifying the participants to ensure a broader representation of students and teachers. This will enhance the study's external validity and allow for a more comprehensive analysis of the implementation of the scientific approach.
3. Discuss the role of technology: Explore the role of technology in supporting the implementation of the scientific approach in social science learning. Consider discussing using digital tools or online resources to facilitate interactive and engaging learning experiences.
4. Provide a comparative analysis: To gain a deeper understanding of the effectiveness of the scientific approach, compare the outcomes and experiences of students in classrooms that implement this approach with those in traditional teaching settings. This comparative analysis will help highlight the specific benefits and challenges of the scientific approach.
5. Suggest practical implications and recommendations: Conclude the article by discussing the practical implications of the study's findings. Provide recommendations for educators, curriculum designers, and policymakers on effectively integrating the scientific approach into social science education. This will enhance the practical relevance of the research and its potential impact on educational practices.

Articles that have been revised and please send them back via this email.
